Object

The value of draft animals depends upon their ability to pull and capacity to endure sustained effort. The object of this test is to determine the sustained maximum pulling capacity and pace of each pair. These tests will afford valuable scientific data on the relation between form and function in draft animals and will stimulate general interest in the breeding and use of good draft horses and in particular it is desired:

- (a) To demonstrate the value of type, soundness and proper breeding in the selection of horses intended for long and arduous draft work.
- (b) To ascertain and to demonstrate the proper method of training and conditioning horses intended for long and severe draft work.
- (c) To encourage horsemanship in fitting harness and in driving.
- (d) To demonstrate the maximum pulling capacity of the horses.
